### DETAILED ACTION

Receipt is acknowledged of preliminary amendments, filed 6/19/01, in which claims 1-50 were cancelled (Paper No. 6) and in which new claims 51-82 were added (Paper No. 7). Claims 51-82 are pending in the instant application.

#### Election/Restrictions

Applicant's election with traverse of Group II (claims 61-82), directed to methods of constructing a nucleic acid construct, in Paper No. 9 (filed 11/13/02) is acknowledged. The traversal is on the ground(s) that there would be no serious search burden for the examiner to examine all of the claims together. This is not found persuasive because the finding that the inventions of the different groups have a different classification is all that need be shown to demonstrate a serious search burden for the examiner to examine all of the claims in one application.

Therefore, the requirement is still deemed proper and is therefore made FINAL.

Claims 51-82 are pending, with claims 51-60 being withdrawn from consideration as being directed to a nonelected invention.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1636

Claims 68-69 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 68 is vague and indefinite in that there is no clear and positive prior antecedent basis for the term "the fragments" in step (a) of claim 61, upon which claim 68 is dependent.

Claims 69 and 81 are vague and indefinite in that the metes and bounds of the phrase "primers are comprised of" are unclear. It is unclear whether the phrase is open or closed claim language. It would be remedial to amend the claim language to clearly indicate if the recited phrase is meant to be open (e.g. "comprise") or closed claim language (e.g. "consist of").

# **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 61-82 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-50 of copending Application No. 10/087,523 (see the attached published application, US 2002/0197624 A1; see

Art Unit: 1636

the entire application). Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons.

The claims of the instant application are directed to methods of generating recombinant targeting constructs for site-directed mutagenesis of target nucleic acid molecules (e.g. a host chromosome). The methods feature ligation-independent cloning steps to generate a vector comprising a positive-selection marker flanked by targeting sequences complementary to a desired target sequence. The claims of the '523 application comprise each of the limitations of the claims of the instant application. In reading the '523 application in order to determine the basis for support of each of the limitations of the '523 claims, one of ordinary skill in the art would recognize each of the steps required for generating the recited constructs of the '523 application, including the steps required for ligation-independent cloning to generate targeting constructs that are analogous to the ones produced by the instant methods. It would have been obvious to one of ordinary skill in the art to practice ligation-independent cloning as taught in the '523 application to practice the methods of producing targeting constructs as claimed in the '523 application. In practicing the invention of the '523 application, one of ordinary skill in the art would practice methods that comprise each of the limitations of the instant claims.

The instant application and the '523 applications are both Continuation applications of the same parent application (09/193,834), having the same inventive entity and assignee. The instant claims and the '523 claims were not restricted from one another in the parent application.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### Conclusion

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gerald G Leffers Jr. whose telephone number is (703) 308-6232. The examiner can normally be reached on 9:30am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Remy Yucel can be reached on (703) 305-1998. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-7939 for regular communications and (703) 305-7939 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
